

Create a rubric

Scenario: You have asked your students to get into groups of 3. After going through an activity, you will evaluate whether they can create an appropriate Peanut Butter and Jelly Sandwich. Create a rubric that evaluates this activity.

Your rubric should have two sections. One evaluates the content/product that has been created, and the second, the process of creating the product (PB&J sandwich). In the end it should look something like this. There should be a series of things you are evaluating under content/product and activity (for example, appearance and group work).

Content/Product

What **activity/outcome** is being evaluated?

- Scale (for example: poor, average.. .)
 - Describe the **criteria/benchmark** that exemplify this category
- Scale (for example: poor, average.. .)
- Scale (for example: poor, average.. .)

Process

What **activity** is being evaluated?

- Scale (for example: poor, average.. .)
 - Describe the **criteria/benchmark** that exemplify this category
- Scale (for example: poor, average.. .)
- Scale (for example: poor, average.. .)
